November 2022 - March 2023

HTML Academy

January 2022 - November 2022

Kyrgyz-Russian Academy of Education (Secondary vocational education)

September 2020 - May 2023

About

A young developer who studies on his own. During my studies, I have written many projects, the best of which can be found in the [portfolio](#)

I have completed many courses and continue to improve every day

During my studies at RS School, I was a team lead in all final projects. This speaks about my communication skills and ability to work in a team

My strengths are the ability to prioritize, and I also perfectly understand what is required of me and do it quickly

I always strive to learn something new and look for additional opportunities for professional growth
